f I'd ask for an autograph.

4 Read the dialogue about dinosaurs. Write *t* (true) or *f* (false).

Mark ..... /5

Alex What are you reading?
Phoebe It's a book about dinosaurs. Which is the biggest dinosaur?
Alex I know that! T-Rex! No, wait! Diplodocus. I think it was the biggest.
Phoebe Well, no, there is a bigger one, the Argentinosaurus. It was a herbivore, like the Diplodocus.
Alex Argentinosaurus? Where did they find it? In Argentina?
Phoebe Yes, palaeontologists have found hundreds of unusual dinosaurs in Argentina. Argentinosaurus fossils were found by a farmer and they were so big that he thought they were pieces of petrified wood. Later it was found that these bones came from a dinosaur. It lived 97 million years ago. It was eight metres tall, 37 metres long and it weighed 100 tonnes. It was eight times heavier than a Diplodocus. Argentinosaurus fossils are national treasures in Argentina so you'll never find this dinosaur's bones anywhere else.

1 Phoebe is reading a book on dinosaurs. [t]
2 Alex knows which dinosaur is the biggest. [ ]
3 Diplodocus was the biggest dinosaur. [ ]
4 The Argentinosaurus was bigger than T-Rex. [ ]
